Steven,

Operations for today went as follows,

Clean harbors continued to remove soiled vegetation from banks along creek,

I had a conversation with Gary Cameron regarding the warm water flush, and he mentioned that they were not going to proceed in that direction. Gary said that the plan was shut down from above. I went ahead and told him that you were interested in running a trial run to see the effectiveness of the process, but he mentioned that they had direction not to go with it.

Jason, Ricky(KIWI), and us agree with you in running a trial first, but unless every agency agrees, Gary is not going to proceed with this.

SCAT operations continued along the creek, 60+00 - 70+00.

Respectfully,

PO2 Eduardo Alcantara Jr
